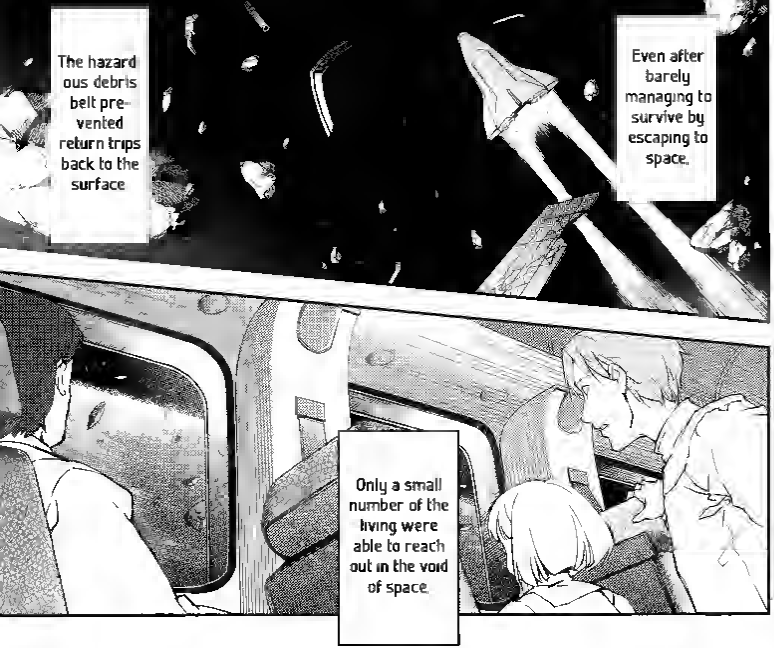
The author of [Sekaijuu Meikyuu 2 ~Rikka no Shoujo] & [Nekogami Yaoyorozu], FLIPFLOP, deliver a new world.
That star ..
On the 3rd of January in the year 2097 A.D., the asteroid, Rudola, fell to the ground

Two great Calamities struck this star.
The first was the annihilation of the civilization on the surface
Space Debris from the Satellites orbiting above accelerated the Casula Syndrome.
The second was



The hazardous debris belt prevented return trips back to the surface.
Even after barely managing to survive by escaping to space,
Only a small number of the living were able to reach out in the void of space.

70 years have passed

27th November, 2167 A.D.
ETA to designated elevation is 300 seconds.
Beep
Hey Suzuro. Your turn is coming up Standby and good luck!
Hey!! Suzuro!
Hmm I wonder if your area 9 Diver will really be okay in that state Ginga-kun
Tch
Are you listening!?

Both New Meditech and Ooshima Pharmaceutics invested in A rankers
I knew it. Isn't it a bit too much for a mere 14 year old girl with a C rank license to escape a pharmaceutical company's security system?
02 Pharmaceutics
Second Research Division's Head,
Joseph S. Tanaka

Hey

The reason why her license is rank C is because she falls short in terms of age for rank B and above exams
However, Suzuro won't lose to any A ranked Divers in terms of experience and results
Say what you want Tanaka-san

Beep
Beep
Please tell them that,
"I suggest that the two of you focus that enthusiasm and dedication towards the task at hand."

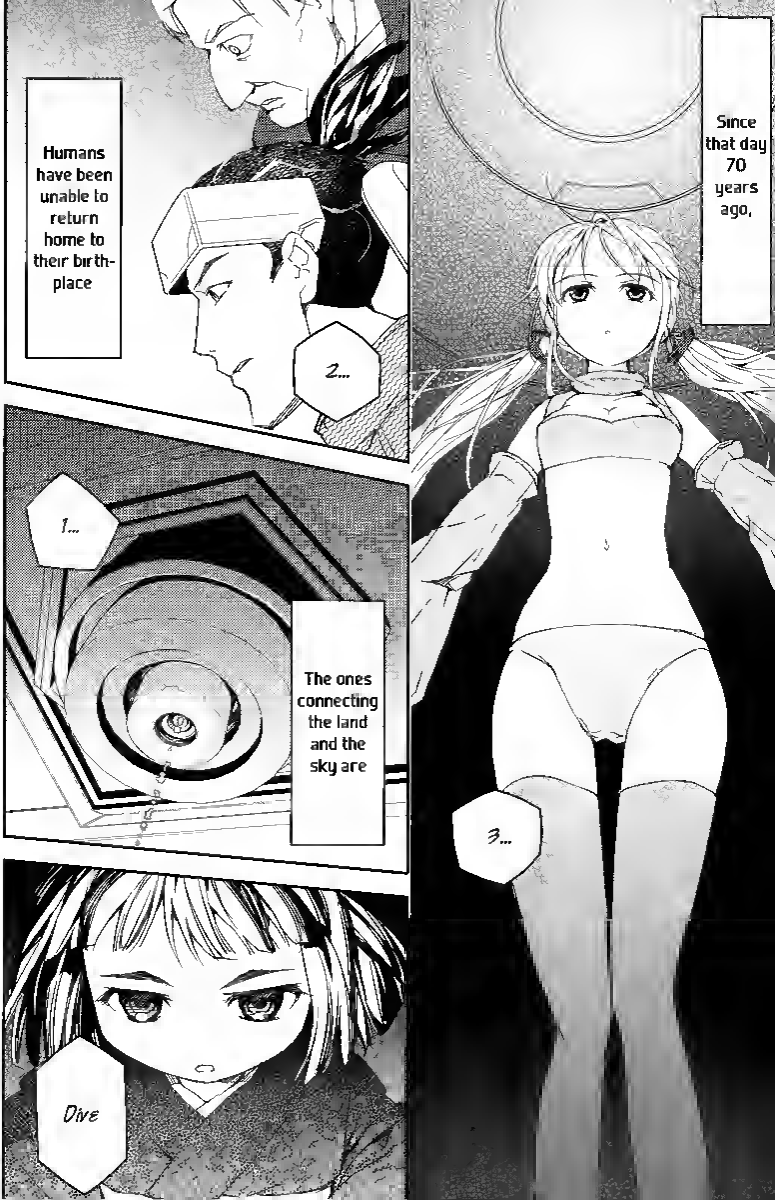
Tsumugi-obaachan
It seems like there's some stuff going on up in the cockpit that we'd better leave alone Suzuro.

She says "You're being noisy. Shut up."
Now see here...
Suzuro has a suggestion for those in the cockpit.
Connecting Tsumugi

If there aren't any problems then let's begin the mission.
Well, you should listen properly to the noise we're making

Suzuro
...Roger

As I told you before, the time frame we have for establishing a link to the access point in Sacramento, California in North America is approximately 15 minutes
Before the connection gets cut, I will switch over to the new Apple access point
The connection will be unstable for several seconds as the distance to our target the Shinonome Pharmaceutical server will increase further
Roger. Counting down from 5
Shimagi-obaachan
Run the Diver Scan. The Shinonome Pharmaceutical server is still on autopilot
Finish this within 15 minutes
5...
4...



Since that day 70 years ago,
3...
Humans have been unable to return home to their birth-place
2...
1...
The ones connecting the land and the sky are
Dive

A fine micropulse beam is transmitted through the sea of stardust
Beep

Beep
Beep

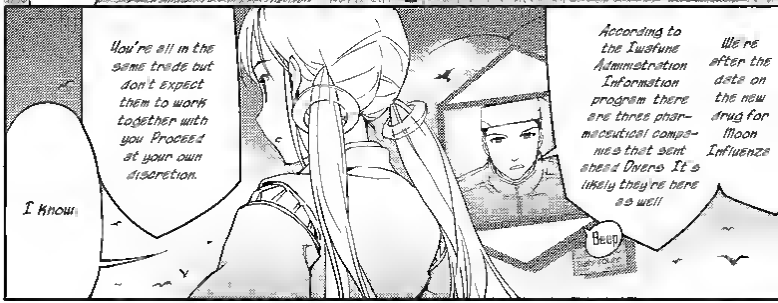
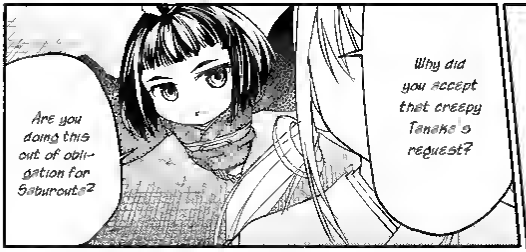
TAP
Phew...

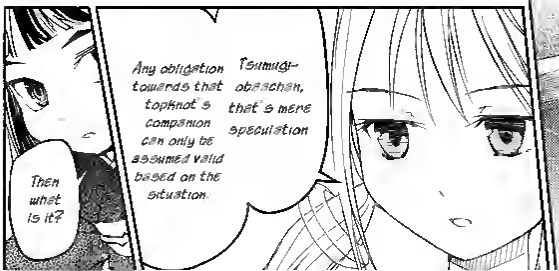
I will now proceed through the entrance.
OK
Connection to the Shinonome Pharmaceutical server has been established without any errors



You're all in the same trade but don't expect them to work together with you. Proceed at your own discretion.
I know.
According to the Iwafune Administration Information program there are three pharmaceutical companies that sent agent Overs. It's likely they're here as well.
We're after the data on the new drug for Moon Influenza
Beep



Are you doing this out of obligation for Saburouta?
Why did you accept that creepy Tanaka's request?



Then what is it?
Any obligation towards that topknot's companion can only be assumed valid based on the situation.
Tsumugi-obaachan, that's mere speculation

Say Suzuro, we can only talk here so

5 days ago.
Mmmm mm
Orbital Colony Iwafune.
If I move this, then that will come, so that's a no...
1st Level
Item shop Tinkerbell, Narukami Shopping District
Tinkerbell
Hurry up will you.
Looks like I'll have to go with this...

Eh
Yes
This is your weak spot isn't it, Suzuro!
Alright. How's that!
PING!

Huh Could it be that I've lost...?
Actually I won 3 moves ago

It's alright Touko is not weak
Really!?
Ahaha. Onee-chan's weak!
It's unfair to tease a beginner!
Darnit! Then you should have said so!

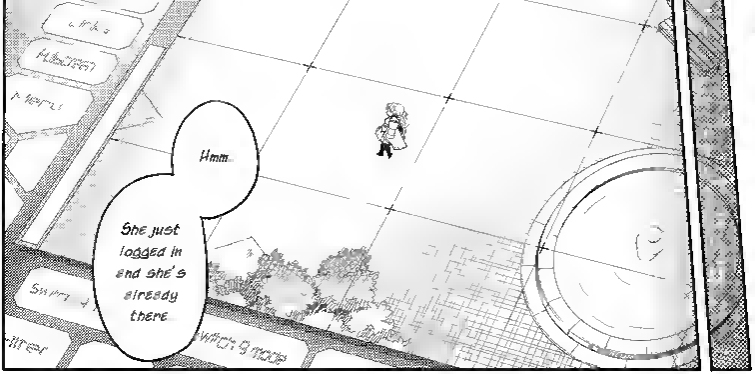
And that makes Touko the 2nd strongest in the universe
Right now, I'm the strongest in the universe
After all the one who salvaged and rebuilt this game was me
ピーン
You still have to practice though.
All you have to do is come to this store and purchase them
If you want to become better at this game,
How disappointing... I'm not going to.
Even if I use my entire pocket money dad and grandpa gave me, it still wouldn't be enough to buy them!
I want to, but they're way too expensive!
Just lose!

Come to think of it you two where is your grand-father?
Grandpa's in the hospital
They said he's got Moon Influenza
It's contagious so we can't go see him! That's what they said
He didn't come along today?
Moon Influenza
You don't need to worry. He's just fine!
He'll definitely be back on his feet making noise like it was nothing!
カチッ click
ピピピ Beep Beep
I see...
Beep

Even on the orbital colony Iwafune, symptoms of moon influenza are prevalent
Today, the Iwafune's administration has issued a statement that quarantine measures will be reinforced and that the distributors of medical treatment and also immunization will...

Just on Iwafune alone over 30.000 people have been infected and more than a thousand of those are children and the elderly. Simulations of fatalities appearing also indicate...
The recent epidemic of the highly infectious virulent Type O Virus has sparked concerns among the public

Tsumugi-obaachan
Hey Suzuro!
It's quite a busy virus
There's a job offer on the phone



Hmm...
She just logged in and she's already there.

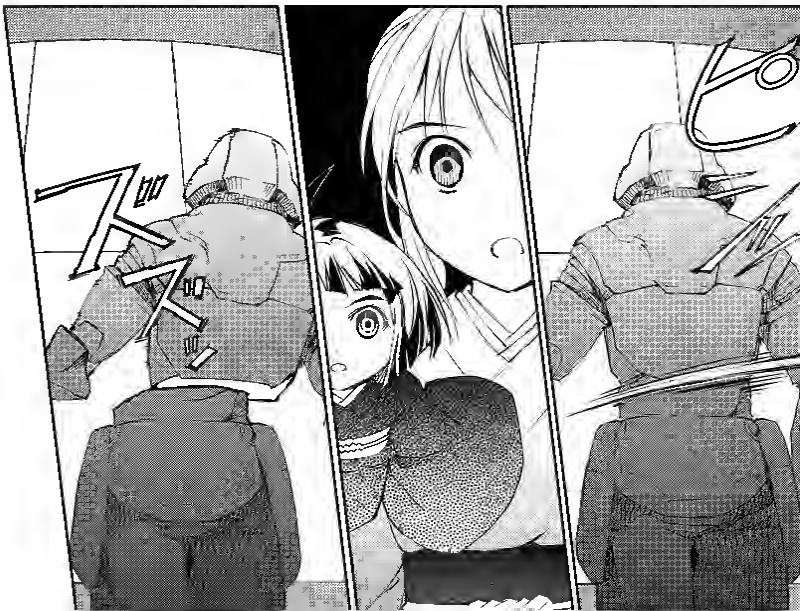
Could you please be quiet for a bit
Tanaka-san
If they leave it to the machines, then just about anyone can reach that far.

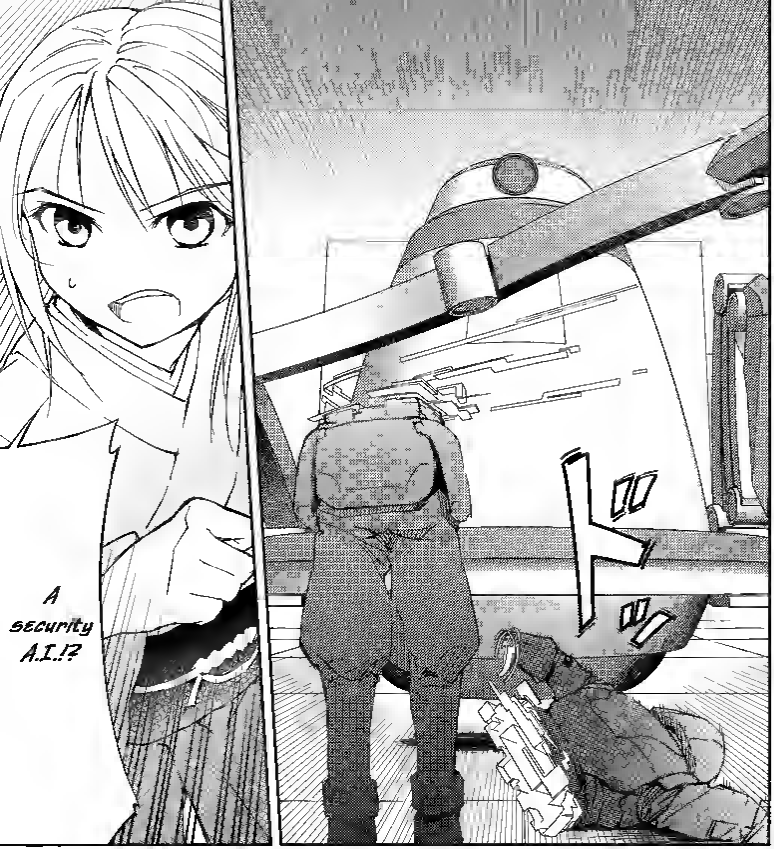
Real space is completely silent
Link Level
SAFETY
Now then looks like her Link Level has stabilized at 7648
Also there's no danger from the surrounding debris orbiting around us.

There are Boids acting busy over here
Suzuro how are things on your end?
Boids (Imitate Bird Bird)
The flight formations of these birds are simulated animation programs.

So how should we proceed from here, Suzuro
Should we start off the crude way?
We're just starting, so let's go with the technical approach first. Tsumugi-obaachan.
How typical of the security in a pharmaceutical company's server. This space's design is devoid of anything interesting.
Whether it's interesting or not is beside the point, you guys...

?
There's a guy there
SLIDE
So another Diver got here before us huh~

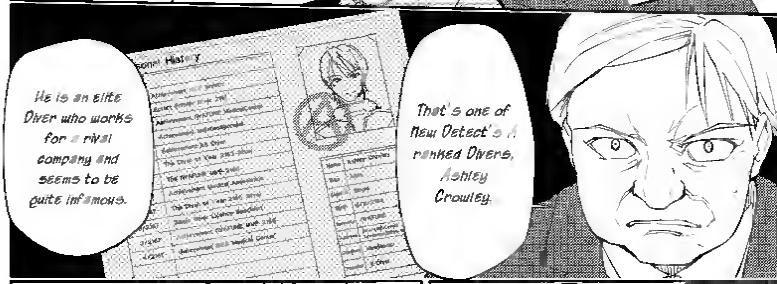




A security A.I.!?
ドン

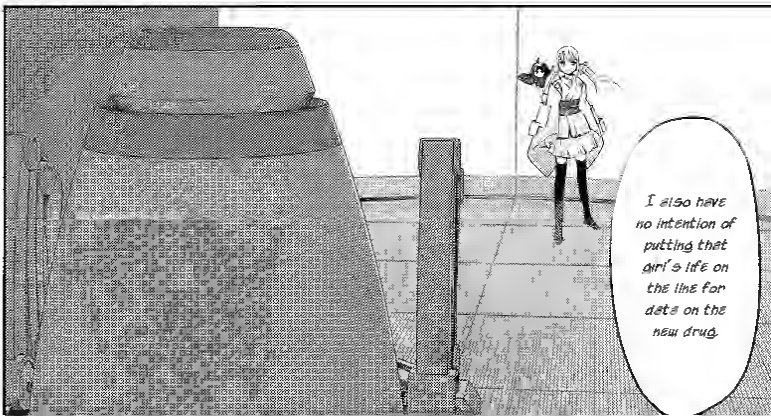
Damage to the Avatar aside, that kind of state could lead to the Diver's own death!
Damn! Which company went and hired that amateur!?

Freelancers like you may not know of him, but, that man has quite the reputation in our line of work.
No Ginga-kun
That man is no amateur..

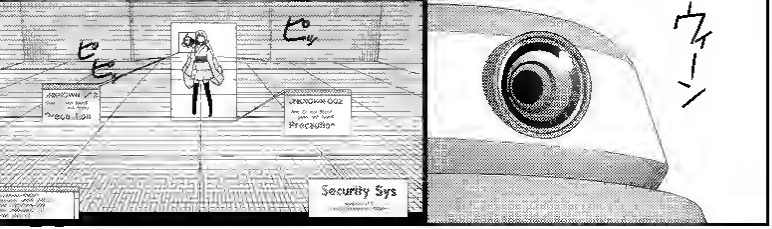


He is an elite Diver who works for a rival company and seems to be quite infamous.
That's one of New Detect's A ranked Divers, Ashley Crowley.

Ginga-kun...
I won't say anything bad so have her withdraw before it's too late.
...Hey hey, an A rank Diver shouldn't be taken down at the entrance.
On top of that, this is an area open to the public isn't it...



I also have no intention of putting that girl's life on the line for data on the new drug.



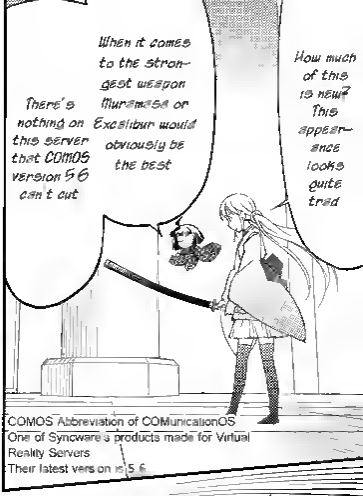
Security Sys

Beep
Beep Beep
I think we should watch out for that security A.I
This looks bad Suzuro.

Or could it be that
Did it deduce what our goal is based on the situation?
Also, if that were the case, then the server would have just denied our connection in the first place...
We took advantage of a family member's account of one of Shimonome Pharmaceutical's employees to make things easier, didn't we?
She just got marked all of a sudden
Are you certain that the login account that you used isn't blacklisted?

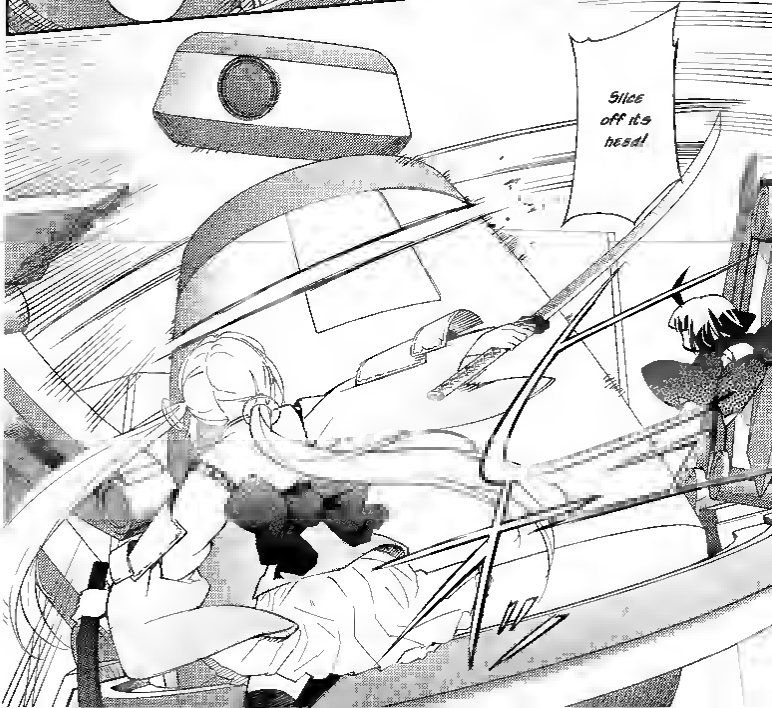
Beep
Look at the top! This security A.I. has a bug in it!
Newly developed?
After all this time, I've finally got the chance to test out the newly developed combat use WeaponWare
Here we go
Summoning
Wahahaha! Are you sure you don't mean convenient!
It seems that things have turned out rough, just the way you like it, Tsumugi-obaachan

Demon Blade Mura-masa!



How much of this is new? This appearance looks quite tired
When it comes to the strongest weapon Murasama or Excalibur would obviously be the best
There's nothing on this server that COMOS version 5.6 can't cut

COMOS Abbreviation of COMunicationOS
One of Syncware's products made for Virtual Reality Servers
Their latest version is 5.6



Oooh That was pretty good Suzuro!
I'm fond of Virtual Reality games on the net.
Do they teach Iai in schools these days?
Suzuro! The next wave is coming up!

Those girls may be one of the elite, but they should retreat to a safer area while they still can.
Ginga-kun she may have plenty of spirit to spare in there but there isn't a trace of battle tactics being used at all
Keep this Rhythm up!
As expected of Suzuno and Tsumugi!
You-
I said to withdraw didn't I! Or could it be that
Look here! Who do you think it was that sent us to break into this threat!
Who the hell said anything about money!?
You asshole!
You want your precious pay slip that badly?

ビリッ

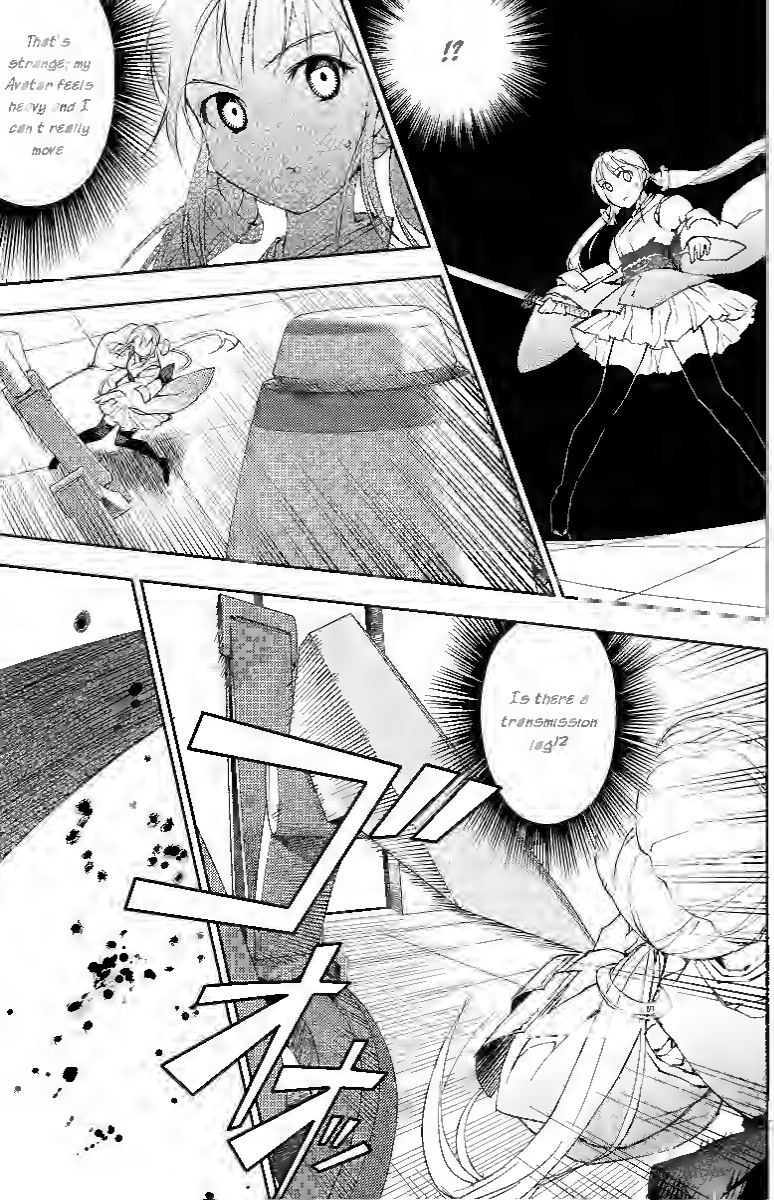
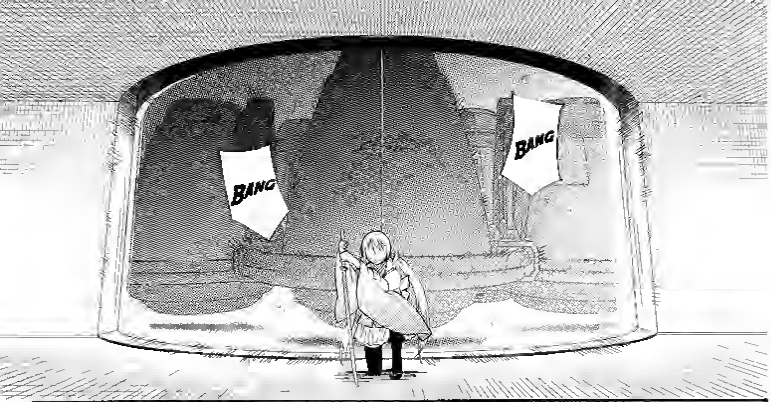
!!



That's strange, my Avatar feels heavy and I can't really move
!?
Is there a transmission lag!?
ドオッ

SLIDE



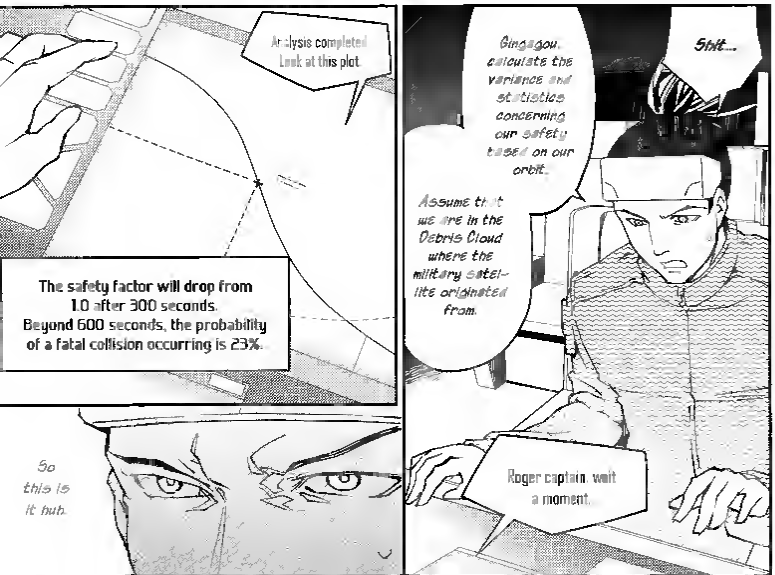
BANG
BANG

ばぁ
ばぁ
ビィ
ビィ

Haa
Are you alright, Suzuno!?
I'm fine. It's just a scratch.
Rather than that, go find out what's the situation from that Topknot

My bed! Some debris probably hit us!
Hey! What was with that lag just now!
What happened on your side!?
Shit! The radar's warning alarm is also...
The ship didn't take any major damage, and we managed to return back to position, but the communication antenna's angle still slipped off for a second.
Damage Report
Crap..
Don't believe this...
!
It's quite likely we're inside of a Debris Cloud where the military satellite came from..
Debris(Invisible) Collision Risk
There's an 89% probability that we're dealing with military satellite stealth materials!
Gmosqou's A.I inference system says the impact just now was due to a run in with "Shadow Debris"

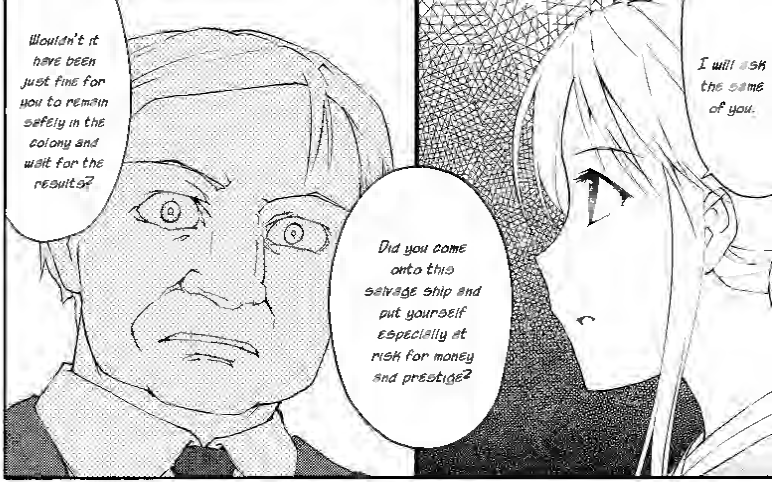
"This ship could be surrounded by a countless number of Shadow Debris and we have no idea when we might take a fatal collision"!
In other words, you're saying that
In this sort of situation, I doubt that there is a captain who would want to go down with their ship.



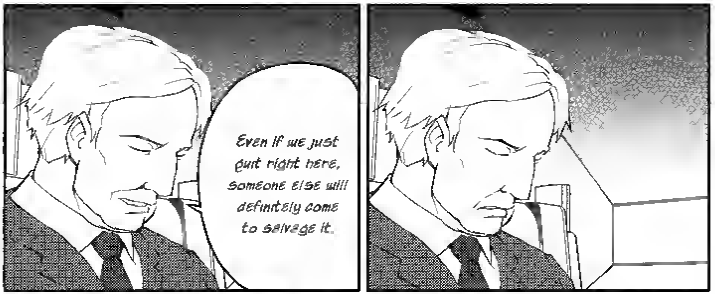
Analysis completed. Look at this plot.
The safety factor will drop from 1.0 after 300 seconds. Beyond 600 seconds, the probability of a fatal collision occurring is 23%.
So this is it huh.
Shit...
Ginga-san, calculate the variance and statistics concerning our safety based on our orbit.
Assume that we are in the Debris Cloud where the military satellite originated from.
Roger captain, wait a moment.

We will hereby abort the mission at this point
To all crew members this is the captain speaking
Suzuro and Tsumugi are to immediately...
Wait
No can do
Right now, it's not just us on this ship
Tanaka-san is also on here, as our guest
We cannot expose him to danger greater than what we had anticipated...!
Just a little longer.
Give me three more minutes

What is it Suzuro-kun?
Are you listening?
Tanaka-san
The Earth's Virtual Reality Network is an automatic mechanism but it still requires maintenance. It is not such a miraculous machine
If we run now we may not be able to access this server a second time
Why do you intend to go so far...
Haa
Do you really need money that much?
Or could you be doing this simply for some glory?
Please give me three more minutes
I beg you.



Wouldn't it have been just fine for you to remain safely in the colony and wait for the results?
Did you come onto this salvage ship and put yourself especially at risk for money and prestige?
I will ask the same of you.



Even if we just quit right here, someone else will definitely come to salvage it.

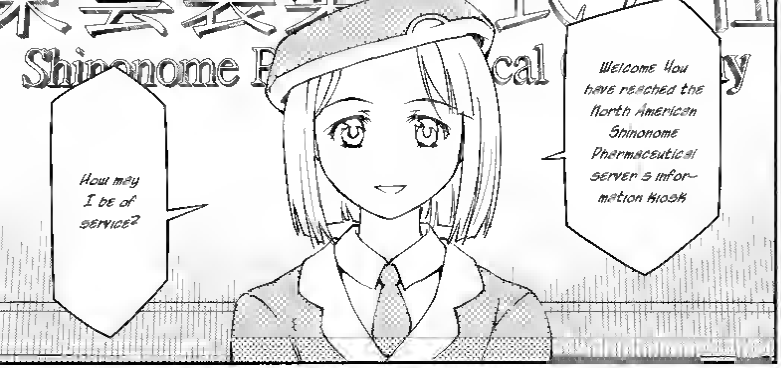
I saw him fall right before my very own eyes
Halfway through, I saw New Meditech's Salvager

"Someone else"
That's who
we are.

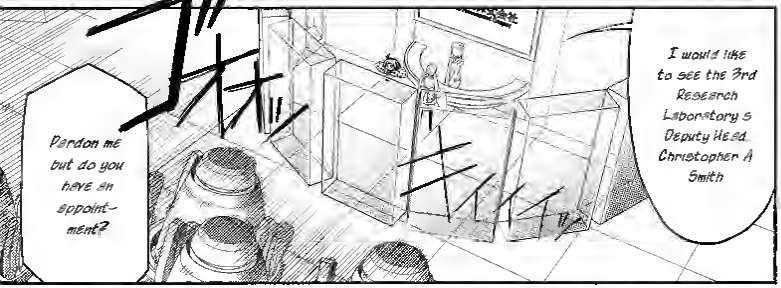
After all, that Data will benefit mankind in no small way and it will bring my company a huge amount of profit.
I will give you your three minutes
...Thank you
I just changed my mind on using this rare opportunity to show New Meditech up
You don't need to be so polite
Let's go Suzuro! You have 180 seconds left!
When it comes down to it, you just piss me off but you're still worth respecting!
In what way?
Tanaka-san, you remind me a bit of my dead old man

SLIDE
Suzuno!
You have 170 seconds left so don't dilly-dally!
I know that!
I'm taking a shortcut to our target's address!
How!?
We still don't have administrative control over this server yet!?

In that case, I really have to do it the crude way.
I'm going to ask that receptionist for the address!
Hey now No matter how much we...
!
I see...
Obaa-chan! Raise a defensive wall!
I need 30 seconds!
Leave it to me!
That's definitely more of a technical move!

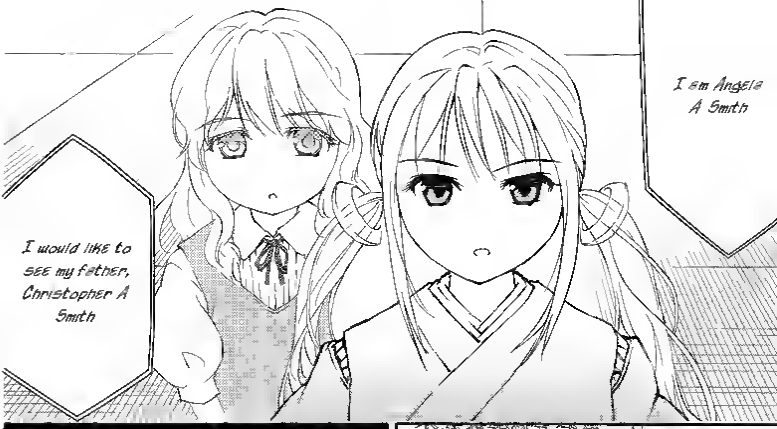


Shinonome P cal y
Welcome You have reached the North American Shinonome Pharmaceutical server s information kiosk
How may I be of service?



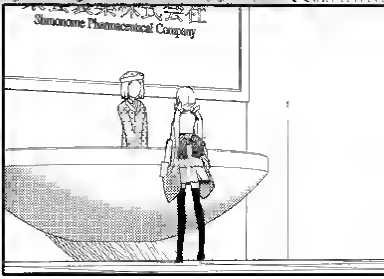
I would like to see the 3rd Research Laboratory s Deputy Head Christopher A Smith
Pardon me but do you have an appoint- ment?

Suzuro! We don't have long!
These fellows have some decent attack power!
I don t have an appoint- ment
I'm sorry, but without an appoint- ment a meeting would be..



I am Angela A Smith
I would like to see my father, Christopher A Smith

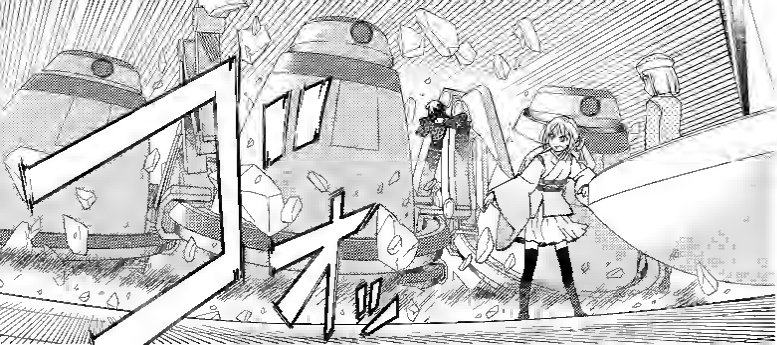
Beep
Angela A Smith
Visa authorization



Shimonome Pharmaceutical Company

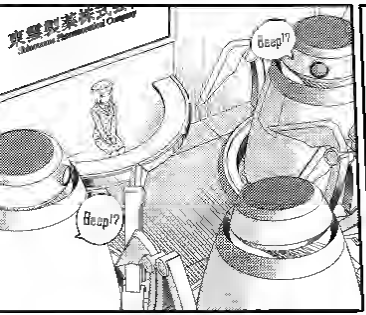
I have confirmed your guest account as a family member that did not move here with our employee
I will now issue you a Level 1 pass.

Suzuno I can't hold them off any longer!

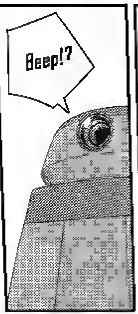


ゴオッ

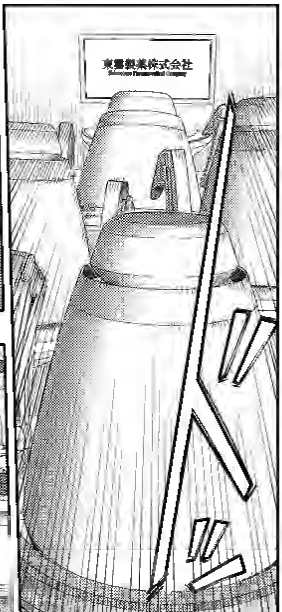
Transfer me to my father's room!



東豊製薬株式会社
Beep!?
Beep!?

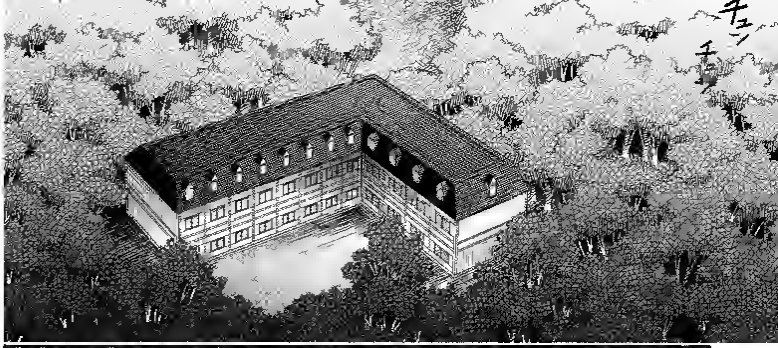


Beep!?



東豊製薬株式会社

Please enjoy your day off together.



Christopher A Smith

Guest account Angela A Smith has been certified

SLIDE

PUSH

It seems to be a simple password lock

Coming right up

Obaachan a blank key please

Ho!
Hah!

No need
We don't have to, Tsumugi-obaachan.

It'd be great if we could find a clue to snatching the administrative rights of this server
パラパラ

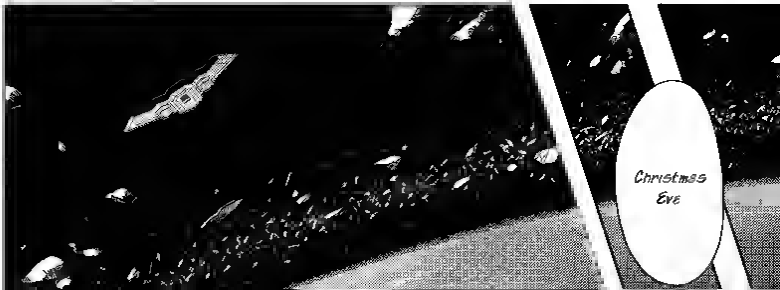
Really!?
In that case we should crack the core database.
Found it.

What did you say!?
PHOOM
All the data related to the new drug is right here

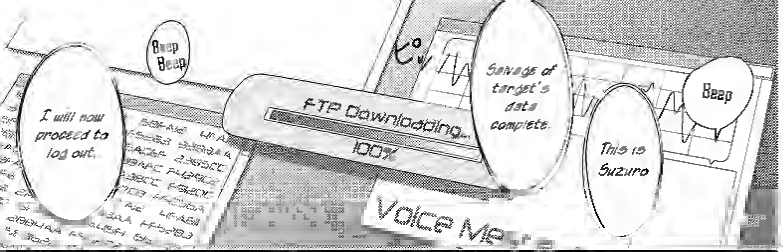
Even if he could bring such a treasured piece of work like this home, he still couldn't bring it home with him
?
It can't be helped, Okabe-chan

I'm amazed that the deputy head of a research facility would have only so much sense to invest this much security here
It does save me a lot of trouble though

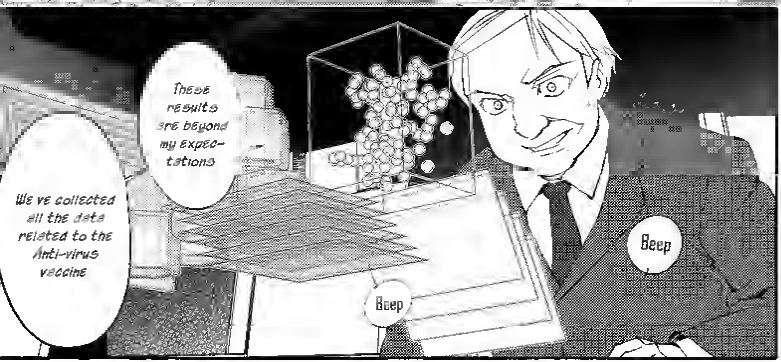
You see the last access timestamp was in 2096



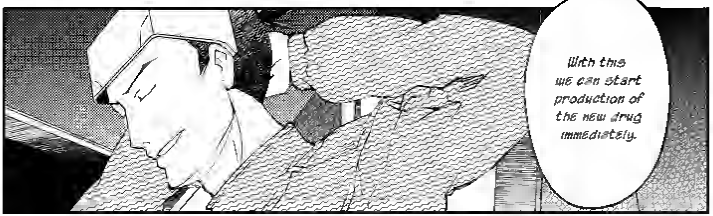
Christmas Eve



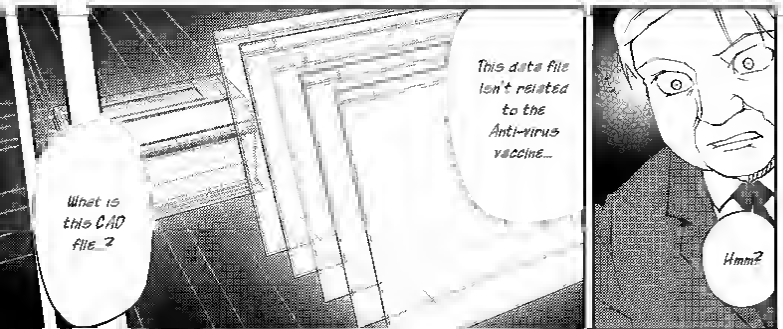
Beep
Beep
I will now proceed to log out.
FTP Downloading...
100%
Salvage of target's data complete.
Beep
This is Suzuno
Voice Me



These results are beyond my expectations
We've collected all the data related to the Anti-virus vaccine
Beep
Beep

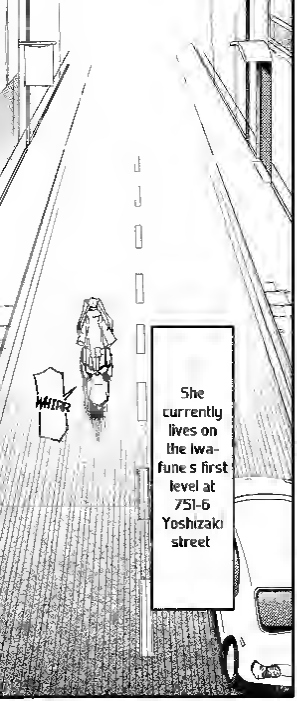


With this we can start production of the new drug immediately.

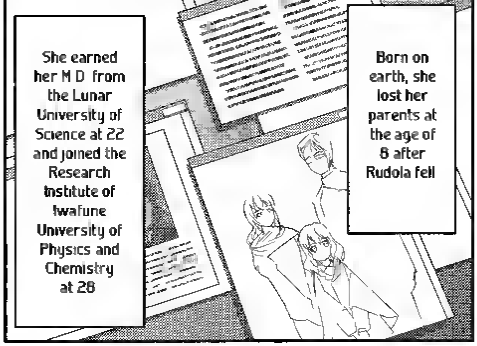


This data file isn't related to the Anti-virus vaccine...
What is this CAD file...?
Hmm?

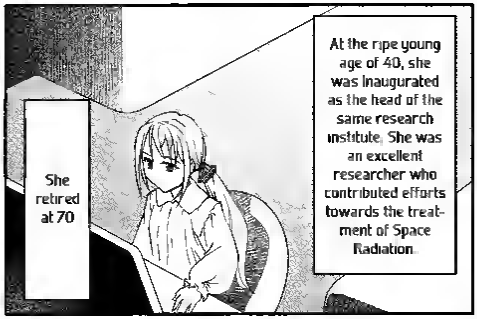
1 Month Later
24th December, 2167 A.D
Orbital Colony Iwafune
And as concerns regarding the type D Moon Influenza virus subside, the Iwafune Administration has lowered the alert level down to stage 1
For now there is still a need to monitor the situation in case of another outbreak
Yes
What we just delivered was not part of our inventory.
The address we just delivered to doesn't appear to be on the store's client list.
Is there really no problem?
?
What?
Hey hey Suzuro!
And also just recently, the new anti-influenza drug "Sureza" has urgently been approved
WHIRR
Kokoro
A grade 8 AI that dwells within Suzuro's house
Angela A. Smith
WHOOOSH



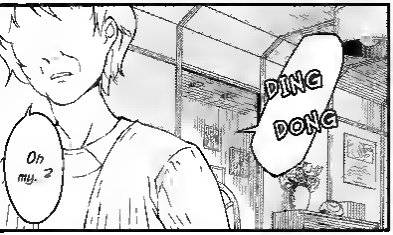
WHITTER
She currently lives on the Iwafune's first level at 751-6 Yoshizaki street



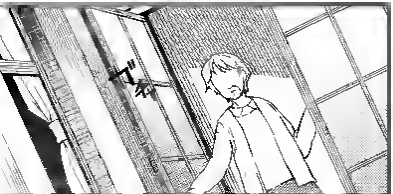
She earned her M.D. from the Lunar University of Science at 22 and joined the Research Institute of Iwafune University of Physics and Chemistry at 28
Born on earth, she lost her parents at the age of 8 after Rudola fell



She retired at 70
At the ripe young age of 40, she was inaugurated as the head of the same research institute. She was an excellent researcher who contributed efforts towards the treatment of Space Radiation.



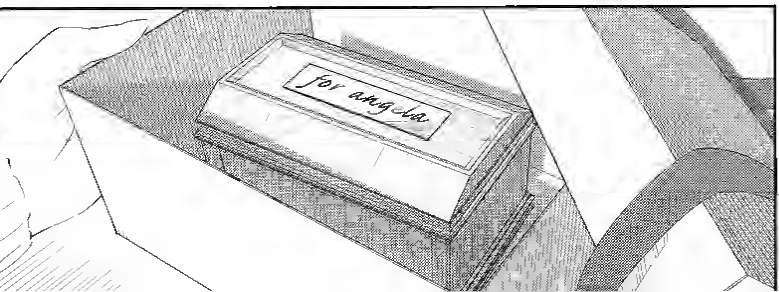
DING DONG
Oh my...?



Oh my
This is...?
No one's here...?
We dropped it off quietly. She might mistake it for a bomb threat though
Did you deliver it to her properly, Suzuro?
More or less
This store's current situation can't be helped
At-
At any rate, customers won't be coming
It's the last of the Christmas Sale Wars after all

Grandpa came to buy that as a Christmas present!!
SLIDE
Suzuro!
EH!? Mine!?
You're taking this out on me!?
Seems that there won't be much of an increase in your new year's money when I review
Even though I'm not at fault!?
Hey you guys! You're supposed to greet your customers over here!
Tinkerbell
My new year's money!?
The unbelievable came to the store

"for Angela" from Christopher in 2096, the Earth



Merry Christmas.
Offering relief for humanity, the time of giving presents has arrived... And so, those sentiments reach his beloved daughter.
